

Summer Maths Challenges! Reception

Calculating

Throw 2 dice and count how many spots altogether. Repeat. Can you write out

the sums?

Maths Trail

Go for a walk with a grown-up. Look for maths all around you. What can you find? Can you find some shapes? Can you find some numbers? Can you find any patterns? Perhaps you could take some photographs of what you see? Or draw pictures?

Counting

Look around your home and do some counting. Here are some ideas:

- How many forks are in the kitchen drawer?

- How many books are on the shelf?
- How many buttons are on the TV remote control?
- How many windows are there?

Record your objects and numbers in a table. Think of some of your own!
